# METEOROLOGY TRIBUTE

## CLOSE READING PASSAGES

GRADE 2-3

Name: \_\_\_\_\_

### Weatherman's Day

Weatherman's Day is a special day also known as weather scientist's day. Weather scientists use tools like thermometers to collect data about the weather. Weatherman's Day celebrates the importance of meteorologists.

Name: \_\_\_\_\_

### Meteorology Tribute

Meteorologists

Name: \_\_\_\_\_

### Meteorologists

Meteorologists are scientists who study the weather. They use special tools to help them understand what the weather will be like. These tools include thermometers to measure temperature, barometers to measure air pressure, and anemometers to measure wind speed.

Name: \_\_\_\_\_

### Atmospheric Science

Meteorologists are scientists who study the atmosphere and weather. They use special tools to help them understand what the weather will be like.

Name: \_\_\_\_\_

### Weather Predictions

Meteorologists are scientists who study the weather. They use special tools like thermometers, barometers, and weather balloons to help them understand what the weather will be like. They also use computers to analyze data and make predictions about changes in the weather.

Name: \_\_\_\_\_

### Climate Analysis

Meteorologists are scientists who study the weather. They use special tools like thermometers, barometers, and weather balloons to help them understand what the weather will be like. They also use computers to analyze data and make predictions about changes in the weather. What are some ways that meteorologists can predict if it will be sunny, rainy, or snowy?

Name: \_\_\_\_\_

### Meteorological Insights

Meteorologists are like detectives who study the weather. They use special tools to learn about clouds, rain, wind, and sunshine. These weather experts help us know if it will be hot or cold, rainy or sunny.

## Weatherman's Day

Weatherman's Day is a special day dedicated to meteorologists also known as weather scientists. Meteorologists use special tools like thermometers to measure temperature, barometers to measure air pressure, and weather balloons to collect data about the atmosphere. Weatherman's Day celebrates the important work that meteorologists do.

Name: \_\_\_\_\_

## Meteorology Tribute

Meteorologists are scientists who study the weather. They use special tools like thermometers, barometers, and rain gauges to measure the weather. Meteorologists help us understand the weather, whether it is rainy, or windy. They also help keep us safe by predicting the weather. Meteorologists are like weather detectives who are always watching the sky and predicting what will happen next.

Name: \_\_\_\_\_

## Meteorologists

Meteorologists are scientists who study the weather to help them understand it better. These tools include thermometers, barometers, and weather balloons. They use these tools to measure temperature, air pressure, and wind speed. They also use satellites to collect data about the atmosphere.

## Atmospheric Science

Meteorologists are scientists who study the atmosphere and weather. They use special tools like thermometers, barometers, and weather balloons to collect data about the atmosphere. They also use satellites to collect data about the atmosphere.

Name: \_\_\_\_\_

## Weather Predictions

Meteorologists are scientists who study the weather to help them understand it better. These tools include thermometers, barometers, and weather balloons. They use these tools to measure temperature, air pressure, and wind speed. They also use satellites to collect data about the atmosphere.

Name: \_\_\_\_\_

## Meteorological Insights

Meteorologists are like detectives who study the weather. They use special tools to learn about clouds, rain, wind, and sunshine. These weather experts help us understand the weather and predict what it will be like. They also help us know if it will be hot or cold, rainy or sunny.

Name: \_\_\_\_\_

## Climate Analysis

Meteorologists are scientists who study the weather. They use tools like thermometers, barometers, and weather balloons to understand what the weather will be like. By looking at things like temperature, air pressure, and wind, meteorologists can predict if it will be sunny, rainy, or snowy.

1. What tools do meteorologists use to understand the weather?

2. What can meteorologists predict if it will be sunny, rainy, or snowy?

3. How do meteorologists study the weather?

1. What do meteorologists study?

2. What tools do meteorologists use to understand the weather?

3. How do meteorologists predict the weather?

1. What do meteorologists study?

2. What tools do meteorologists use to understand the weather?

3. How do meteorologists predict the weather?
