WHAT I LEARNED

Ready to Print

In many parts of the world, September is known as "Honey Month." During this time, bees are busy collecting nectar from flowers to make honey. Bees work together in hives, buzzing from one flower to another. They store the nectar in honeycombs inside their hive. Once the honeycombs are full, the bees cap them with beeswax. Then, people collect the honey to enjoy its sweet taste.

What You have learned so far?

WHAT I LEARNED

1. What is September known as in many places?

2. How do bees make honey?

3. What are some treats people make with honey?
