WHAT I LEARNED

Ready to Print

Every four years, we have a special year called a leap year. In a leap year, we add one extra day to the month of February. Normally, February has 28 days, but in a leap year, it has 29 days. This extra day helps keep our calendar in line with the Earth's journey around the sun. The next leap year will be in 2024. Leap years are fun because they give us one more day to play, learn, and enjoy!

What You have learned so far?

WHAT I LEARNED

1. When is the next leap year?

2. How many days does February have in a leap year?

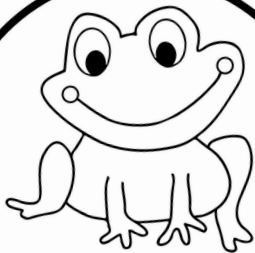

3. How often do leap years occur?
