**DENTAL
HEALTH
MONTH**

Ready To Print

Dental Health Month is an exciting time for third-graders to learn about the importance of taking care of their teeth. Throughout the month, students explore various aspects of dental hygiene, including the proper way to brush and floss, the significance of regular dental checkups, and the impact of a healthy diet on their teeth. They engage in interactive activities, educational games, and perhaps even a visit from a local dentist. This month-long focus on dental health helps instill good oral hygiene habits early on, setting the foundation for a lifetime of healthy smiles.
