WHAT IS THE SUMMER SOLSTICE?
The Summer Solstice is a special day that happens every year in June. It marks the beginning of summer in the Northern Hemisphere. On this day, the sun shines the brightest and longest, giving us more daylight than any other day of the year.

LONGEST DAY
During the Summer Solstice, we get to enjoy the longest day of the year. From this moment the sun rises in the morning until it sets in the evening, we have lots of time to play outside, have picnics, and enjoy fun activities with our friends and family.

STANDSTILL
The word "solstice" comes from Latin words that mean "sun" and "stand still." It's like the sun is taking a little break at its highest point in the sky. This happens because the Earth's axis is tilted towards the sun, making it appear to stand still for a moment.

CELEBRATING WITH BONFIRES
One way people celebrate the Summer Solstice is by lighting bonfires. Bonfires are big fires where people gather to sing, dance, and tell stories. It's a fun way to celebrate the sun and all the warmth it brings to our days.

ANCIENT TRADITIONS
