WAYS TO KEEP OUR OCEANS CLEAN
There are many things we can do to help keep our oceans clean. We can recycle single-use plastics like straws, bags, and bottles. Recycling helps prevent them from ending up in the ocean. Raising awareness about ocean pollution can also make a difference.

KEEPING OUR OCEANS CLEAN

Our oceans are vast and beautiful, filled with colorful fish, playful dolphins, and majestic whales. But did you know that our oceans need our help to stay clean and healthy? Let's explore why it's important to keep our oceans clean and what we can do to protect them.

SAVE THE OCEANS

KEEPING OUR OCEANS CLEAN

Choose the correct answer.

Main topic of the passage:
A. Forests
B. Clean oceans
C. Endangered species
D. Plastic bottles

What is important?
A. Food for birds
B. The Earth's climate
C. The many trees
D. Essential for farming

What is considered as a threat to ocean health?
A. Pollution
B. Overfishing
C. Climate change
D. All of the above

How can we affect marine life?
A. By using plastic
B. By using glass
C. By using paper
D. By using metal

KEEPING OUR OCEANS CLEAN

Our oceans are vast and beautiful, filled with colorful fish, playful dolphins, and majestic whales. But did you know that our oceans need our help to stay clean and healthy? Let's explore why it's important to keep our oceans clean and what we can do to protect them.

THE IMPORTANCE OF CLEAN OCEANS

Oceans are essential for life on Earth. They provide us with food, oxygen, and regulate the Earth's climate. Millions of people around the world depend on the ocean for their livelihoods, whether they're fishermen, scientists, or beach lovers. Keeping our oceans clean is crucial for the well-being of both marine life and humans.

THREATS TO OCEAN HEALTH

Unfortunately, our oceans face many threats. Pollution from plastic waste, chemicals, and oil spills harm marine life and damage delicate ecosystems. Overfishing, where too many fish are caught, can deplete fish populations and disrupt the balance of ocean life. Climate change also poses a threat to oceans, causing rising temperatures and ocean acidification.

IMPACT OF OCEAN POLLUTION

Ocean pollution has a devastating impact on marine life. Animals can become entangled in plastic debris or mistake it for food, leading to injury or death. Chemical pollution can harm fish and other marine creatures, making them sick or affecting their ability to reproduce. Oil spills can coat birds and marine mammals in sticky oil, making it hard for them to swim and fly.

WAYS TO KEEP OUR OCEANS CLEAN

There are many things we can do to help keep our oceans clean. We can reduce our use of single-use plastics like straws, bags, and bottles. Recycling and properly disposing of trash can prevent it from ending up in the ocean. Participating in beach clean-ups and spreading awareness about ocean conservation are also important ways to make a difference.

TAKING ACTION

As individuals, we all have a role to play in protecting our oceans. Whether we live near the coast or far inland, our actions can have an impact on the health of our oceans. By making small changes in our daily lives and encouraging others to do the same, we can help ensure clean and healthy oceans for future generations to enjoy.

CONCLUSION

Our oceans are precious and worth protecting. By understanding the importance of clean oceans and taking action to address the threats they face, we can make a positive difference. Let's work together to keep our oceans clean and thriving for all creatures, big and small.

Name _____

Date _____

KEEPING OUR OCEANS CLEAN

DIRECTIONS CHOOSE THE CORRECT ANSWER.

1. What is the main topic of the passage?

- a) Protecting Forests
- b) Keeping oceans clean
- c) Saving endangered species
- d) Recycling plastic bottles

2. Why are oceans important?

- a) They provide food for birds
- b) They regulate the Earth's climate
- c) They are home to many trees
- d) They are essential for farming

3. What is mentioned as a threat to ocean health in the passage?

- a) Planting trees
- b) Recycling plastic
- c) Overfishing
- d) Cleaning beaches

4. How does pollution affect marine life?

- a) It helps them thrive
- b) It has no impact
- c) It harms them and damages ecosystems
- d) It makes them stronger

5. What is suggested as a way to reduce ocean pollution?

- a) Using more single-use plastics
- b) Recycling and properly disposing of trash
- c) Ignoring beach clean-ups
- d) Spreading awareness about deforestation

SHORT ANSWER QUESTIONS

1. Why are oceans important for life?
2. What are some threats to ocean health in the passage?
3. How does pollution affect marine life?
4. What are some ways individuals can help keep oceans clean?
5. What is the main message of the passage?

6. What is the impact of oil spills on marine life?
a) It helps them fly
b) It makes them healthier
c) It makes it hard for them to swim
d) It has no impact

7. How can individuals help keep oceans clean?
a) By using more single-use plastics
b) By participating in beach clean-ups and recycling
c) By ignoring the threats to oceans
d) By overfishing

8. What is the main message of the passage?
a) Cleaning beaches is fun
b) Oceans are not important
c) Keeping oceans clean is crucial for marine life
d) Recycling plastic is not necessary

9. What is mentioned as a consequence of ocean pollution?
a) Increased fish populations
b) Better balance of ocean life
c) Depleted fish populations and disrupted balance of ocean life
d) Reduced pollution

10. What is suggested as a way to protect oceans from pollution?
a) Using more plastic
b) Participating in beach clean-ups
c) Dumping trash into the ocean
d) Ignoring ocean conservation

ANSWER KEY

MCQ'S

1. b) Keeping oceans clean
2. b) They regulate the Earth's climate
3. c) Overfishing
4. c) It harms them and damages ecosystems
5. b) Recycling and properly disposing of trash
6. c) It makes it hard for them to swim and fly
7. b) By participating in beach clean-ups and recycling
8. c) Keeping oceans clean is crucial for marine life and humans
9. c) Depleted fish populations and disrupted balance of ocean life
10. b) Participating in beach clean-ups

SHORT-ANSWER QUESTIONS

1. Oceans are important because they provide us with food, oxygen, and regulate the Earth's climate.
2. Threats to ocean health include pollution from plastic waste, chemicals, and oil spills, as well as overfishing and climate change.
3. Pollution harms marine life by causing entanglement in plastic debris, ingestion of harmful chemicals, and disruption of ecosystems.
4. Individuals can help keep oceans clean by reducing their use of single-use plastics, recycling and properly disposing of trash, participating in beach clean-ups, and spreading awareness about ocean conservation.
5. The main message of the passage is that keeping oceans clean is crucial for the well-being of marine life and humans, and individuals can make a difference by taking action to address the threats they face.
