## MAKING YOUR OWN YO-YO

Making your own yo-yo can be a fun and rewarding craft project. With just a few simple materials and some creativity, you can create a yo-yo that is uniquely yours. Let's explore the steps involved in making your very own yo-yo.

### GATHERING MATERIALS

The first step in making your own yo-yo is gathering the necessary materials. You will need two wooden discs, a wooden dowel or axle, string, sandpaper, paint or markers for decorating, and wood glue. These materials can usually be found at your local craft store or hardware store.

### CREATING THE DISCS

Start by tracing two circles onto the wooden discs using a pencil and a round object like a cup or lid. Then, carefully cut out the circles using a saw or a sharp knife. Once you have your discs cut out, use sandpaper to smooth out any rough edges and make the surface nice and smooth.

### ASSEMBLING THE YO-YO

Now, it's time to assemble your yo-yo. Take one of the wooden discs and drill a small hole in the center. This will be where the axle goes. Insert the wooden dowel or axle into the hole and secure it in place with wood glue. Once the glue has dried, attach the second wooden disc on top, sandwiching the axle between the two discs.

### DECORATING YOUR YO-YO

Now comes the fun part - decorating your yo-yo! Use paint, markers, or other craft supplies to decorate the surface of the wooden discs however you like. You can add colorful designs, patterns, or even your name to personalize your yo-yo and make it one-of-a-kind.

### ATTACHING THE STRING

The final step in making your yo-yo is attaching the string. Cut a piece of string to your desired length, usually around three feet long. Then, wrap the string securely to the axle several times and tie it off securely.

This project that allows you to create a yo-yo that is uniquely yours. Whether you prefer bright colors or more subtle designs, you can create a yo-yo that is uniquely yours. Unleash your creativity and make your own yo-yo today!

## MAKING YOUR OWN

CHOOSE THE CORRECT ANSWER.

The first step in making your own yo-yo is gathering the materials. These materials can usually be found at your local craft store or hardware store.

  - a) Grocery store
  - b) Craft store or hardware store
  - c) Clothing store
  - d) Electronics store
3. What is used to trace circles onto the wooden discs?
  - a) Paintbrush
  - b) Marker
  - c) Pencil and round object
  - d) Scissors
4. What is used to smooth out any rough edges on the wooden discs?
  - a) Glue
  - b) Paint
  - c) Sandpaper
  - d) Marker
5. How is the wooden dowel or axle secured in place?
  - a) Tied with string
  - b) Wrapped with paper
  - c) Glued into the hole
  - d) Screwed onto the disc

### SHORT ANSWER QUESTIONS

1. What materials are needed to
2. How are the wooden discs cut?
3. What is used to secure the wooden discs in place?
4. What is the final step in making your own yo-yo?
5. How long is the string usually

6. What step comes after assembling the yo-yo?
  - a) Decorating the yo-yo
  - b) Attaching the string
  - c) Gathering materials
  - d) Cutting out the discs

7. What is the final step in making your own yo-yo?
  - a) Decorating the yo-yo
  - b) Assembling the yo-yo
  - c) Gathering materials
  - d) Attaching the string

8. How long is the string usually cut for?
  - a) 1 Foot
  - b) 2 Feet
  - c) 3 Feet
  - d) 4 Feet

9. Where is the string securely tied in?
  - a) To the axle
  - b) To the disc
  - c) To the sandpaper
  - d) To the paint

10. What is emphasized as the purpose of making your own yo-yo?
  - a) To learn a new skill
  - b) To save money
  - c) To personalize your toy
  - d) To buy materials

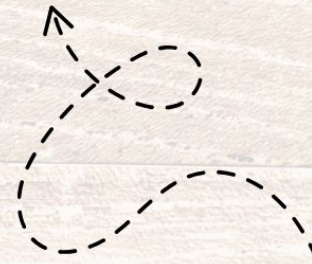

## ANSWER KEY

### MCQS

1. c) Gathering materials
2. b) Craft store or hardware store
3. c) Sandpaper
4. c) Glued into the hole
5. c) Glued into the hole
6. a) Decorating the yo-yo
7. d) Attaching the string
8. c) 3 Feet
9. a) To the axle
10. c) To personalize your toy

### SHORT-ANSWER QUESTIONS

1. Two wooden discs, a wooden dowel or axle, string, sandpaper, paint or markers for decorating, and wood glue.
2. Carefully cut out using a saw or a sharp knife.
3. Wood glue.
4. Attaching the string.
5. Usually around three feet long.
