Mary Sherman Morgan was a brilliant scientist who played a crucial role in launching America's first satellite. She was born in 1921 and grew up loving science. Despite facing challenges, she became the only female rocket scientist at her workplace, where she invented a special fuel that powered the Jupiter-C rocket. Mary's contribution helped put Explorer 1, the first US satellite, into orbit in 1958. Her determination and intelligence made her a pioneer in the field of rocket science.
