Ada Lovelace Byron, also known as Ada Lovelace, was a remarkable mathematician and writer. She was born in 1815 in England. Ada is often referred to as the world's first computer programmer for her work on Charles Babbage's Analytical Engine. She saw the potential for computers to do more than just calculations, envisioning them as machines capable of creating music, art, and much more. Ada's insights laid the groundwork for modern computer programming. She passed away in 1852, but her contributions to the field of computing continue to inspire people around the world.
